

TECHNICAL INFORMATION

AULEKTRO® LENS PROTECT

AULEKTRO® LENS PROTECT

SAFETY AND COVER LENSES

The cover lenses made of polycarbonate not only comply with all the requirements of Directive 89/686/EEC, they also offer special protection against particles traveling at high speed. The extraordinary impact resistance of the original material, polycarbonate, fulfils the requirements of safety class F, this being certified by an EU type-examination certificate.

This enables this material to be put to use not only when welding, but also when sandblasting and cutting metals and non-metallic materials.

The coated polycarbonate with anti-scratch coating has been completely removed from the range and is no longer available.

Aulektro® Lens Protect

Available in the following dimensions:
(1,0 or 1,5 mm thick)

50 x 105 mm

51 x 108 mm

60 x 110 mm

75 x 98 mm

86 x 110 mm

90 x 110 mm

97 x 110 mm

114 x 133 mm

2 x 4 ¼ inch

4 ½ x 5 ¼ inch

Ø 50 mm
